Work format: Hybrid or remote by agreement · Kazakhstan / Europe

Summary

Frontend Developer with 5 years of commercial frontend experience. Specialized in Angular SPAs with TypeScript, JavaScript, RxJS and NgRx; also built a Flutter mobile app from scratch. Delivered multi-module enterprise and CRM UIs with mobile-first adaptive design, integrated REST APIs, wrote unit tests, and improved performance through lazy loading and refactoring. Strong in reusable components, clean code, code review and team delivery of stable product interfaces.

Work experience (5 years)

Khan Group Aug 2024 — present

Frontend Developer

Industrial & business software · multi-module enterprise SPA

- Delivered new features and maintained the Angular enterprise SPA used across internal business operations.
- Developed and supported 15+ Angular modules with RxJS, TypeScript and reusable UI components.
- Integrated REST APIs; stabilized production UI by fixing critical frontend bugs in release cycles.
- Implemented i18n and mobile-adaptive layouts (HTML5, SCSS) from design mockups; optimized load with lazy-loaded routes.
- Refactored shared components and conducted code reviews to keep architecture and quality consistent.

Wisk Telecom Solutions May 2024 — Aug 2024

Frontend & Flutter Developer

Telecom software · Angular SPA and Flutter mobile app from scratch

- Built the Angular SPA of a telecom operations product from scratch with modular architecture.
- Built a Flutter (Dart) mobile client from scratch alongside web work — screens, navigation and API integration.
- Designed lazy-loaded module structure to reduce initial load time; adapted UI for mobile viewports from design.
- Created custom UI components and integrated them with backend REST APIs.
- Improved maintainability through SCSS standards, shared patterns and peer code review.

Steps AI Mar 2023 — May 2024

Frontend Developer

B2B SaaS · admin / user dashboards · real-time chat

- Scaled an Angular + NgRx SaaS SPA with Angular Material and real-time product features.
- Delivered new interfaces and mobile-friendly layouts from design mockups for B2B users.
- Integrated WebSocket chat and notifications; collaborated with Go/Java backend teams.
- Wrote and maintained unit tests (Jasmine/Karma); optimized key flows and fixed production issues.

NCRM Group May 2022 — Mar 2023

Frontend Developer

CRM platform · multi-language business users

- Supported and extended the Angular CRM frontend for multi-language business users.
- Built CRM features with Angular, RxJS, Ng-Zorro and Angular Material; integrated Django REST.
- Implemented drag-and-drop UI, i18n, landing pages and mobile-adaptive layouts from design.
- Participated in CI/CD, production support and team code review.

Freelance Oct 2021 — Apr 2022

Frontend Developer

Client SPAs and landing projects

- Delivered client SPAs with React, Redux, HTML5, CSS3 and REST API integration.
- Implemented responsive and mobile-first UI from design mockups for client projects.

Skills

JavaScript · TypeScript · Angular · Angular Material · PrimeNG · RxJS · NgRx · Flutter (Dart) · HTML5 · CSS3 · SCSS · Mobile-adaptive UI · REST API · WebSocket · Unit testing (Jasmine / Karma) · Reusable components · Lazy loading · Performance optimization · Design patterns · Git · CI/CD · Code review · Scrum · React (secondary)

Education

Università degli Studi di Cassino e del Lazio Meridionale (Unicas), Italy

Economics and Entrepreneurship · Master · enrolled 2023

Economics, business administration, entrepreneurship.

International University of Information Technologies (IITU), Almaty

Information Systems · Bachelor · 2023

Software development, databases, information systems design.
