PROFILE

Frontend developer with 4+ years of commercial Angular (~5 years in frontend). Angular from v9 to the latest versions — standalone components and signals — with advanced RxJS, strictly typed TypeScript and NgRx; Nx monorepo. Built an Angular SPA from scratch and took ownership of existing enterprise, CRM and B2B SaaS codebases. Coding agents (Claude Code, Cursor, Copilot) are part of my daily workflow, including writing skills and project instructions for them.
